Key lock control kit

sunhydraulics.com/model/993008

Sun offers an optional adjustment Key Lock Cover Kit for cartridges supplied with an L control. With this kit, adjustments can be locked with a key to prevent unauthorized changes to the valve setting. Adjustments are easily accessible once the lock assembly is removed via the key. Installation of this key lock kit requires the replacement of the standard locknut with a special adapter locknut which accepts the lock assembly. A new wire stop ring is also provided for overset protection.

TECHNICAL DATA

Title	Key Lock Kit
For Cartridge Models	All Models with L Control
Model Weight	0.14 kg.

NOTES

- Remove original wire stop ring (where applicable) and locknut.
- Thread on the adapter locknut and install new wire stop ring through slot provided.
- Adjust valve to desired setting and torque adapter locknut to 108 lbf in (12 Nm).
- Slide lock assembly over adapter, lock and remove key.

INCLUDED COMPONENTS

Part	Description	Quantity
